

Scenario 2 ‘Cook a European Meal with Friends’

I wanted to cook a meal for friends with a European theme. So I looked on the internet [ICT D1, D2] to find all the EU countries [CI A2] and then made a search of typical recipes from each country that I thought other people might like [LtoL E2] I talked to my friends about what they thought might be best and took into account what they said [IS A1 Co B1,B2] when designing the menu on the computer [ICT C1,C2,C8] We decided who would do what [IS A1,A2] and got it done on time [IS B1,B2] The recipes were for 2 people but we had twelve guests so everything had to be multiplied by six [N B3,B5,B6,B7] I only had a fixed amount of money so I had to check that it came within budget [N C1,C2,C3]
